GOOGLE EARTH INSTRUCTIONS

- 1) install the program ([www.google.com/earth/versions/#earth-pro](http://www.google.com/earth/versions/#earth-pro))
- 2) search for "Mecca" on Wikipedia  
in the upper right, click on longitude and latitude  
in GeoHack, copy the decimal coordinates
- 3) back in GoogleEarth toolbar, click on the push pin  
enter the longitude and latitude  
change name of the untitled placemark to "Mecca"  
transfer to "Medieval" folder
- 4) repeat for the next location
- 5) do the same for context of the "Modern" and "Arab" folders
- 6) save all in single folder (Save > Save Place As...) "CLAS014 - your last name"

\*\* if you don't have a GoogleEarth-ready computer, plot these on the analog base map (.pdf)
